

K-Love radio has been a critical part of our everyday life. My wife and I have it on continually throughout the day gaining much needed encouragement for ourselves that we may pass that on to others in our community. This is a special outreach with so many resources available to all listeners that to lose it would be a shame. There are so many public radio stations that continually bombard my family with music, commentaries etc that are not appropriate for my children. Our community needs a safe place to listen. If this station were to be lost to an LPFM broadcaster it would leave a very empty place on the radio dial for my community.
